FYXX
AI Strategy and Roadmap

Final Report

MM/DD/YYYY

Prepared by: John Doe, CIO

How to use this template

Instructional slide; delete before finalizing presentation.

- This template is intended to be used alongside the *Build Your AI Strategy Roadmap* blueprint to help build your AI strategy and roadmap presentation. It uses sample data from a fictional company, ACME Corp, to demonstrate a sample AI strategy.
- All sample content should be replaced with content and data specific to your organization. To customize the footers or to change the background image of some slides, you will need to edit the slide master. Access the slide master by navigating to View > Slide Master.
- Add, change, or remove content as needed to fit your specific requirements. If you add new slides, make sure:
  - The additional content is relevant and provides value to the reader.
  - The format follows the other slides within the deck.
  - The narrative flow of the deck remains logical and clear.

↓ Download the *AI Strategy and Roadmap Presentation Template*

When you see this box in the *Build Your AI Strategy Roadmap* storyboard, the corresponding activity can be documented in this template.

Guidelines to complete the slide.

Sample ACME Corp Data

When you see purple callouts in this document, follow the instructions to customize the slide with your organization's data. Delete all purple boxes to complete the slide.

Table of contents

Edit this slide based on the content you would like to include in your presentation.

1 Executive Summary

2 Introduction & Business Context

3 Workshop Outcomes

Scope of AI Strategy
- AI vision statement
- AI goals
- Strategic guidelines for AI strategy

AI Maturity and AI Use Cases
- High-value, high-priority AI use cases
- Business goals and AI use cases alignment
- AI maturity dimensions and assessment results

Prioritized AI Initiatives
- Prioritized list of AI initiatives
- Initiative one-pagers for selected AI use cases

Roadmap & Next Steps
- AI initiatives roadmap (Gantt chart format)
- Communication plan

Next steps and communication

Message from the CIO/CXO

Update this slide with a picture of the CIO/CXO and a message from them.

John Doe

CIO, ACME CORP

"An effective AI strategy is not focused on how to leverage AI in our organization but on how AI can help our organization realize its business vision and strategy."

What is ACME's AI strategy?

ACME Corp and its IT department have always embraced the future of technology and innovation. As we continue to identify new and forward-thinking opportunities to support ACME Corp's vision and strategy, it is imperative that we recognize the tremendous potential of artificial intelligence (AI) and the significant impact it can have on our business initiatives.

As we look for ways we can harness the power of AI to support our business objectives, we must follow robust AI governance principles. Rather than asking where the organization can introduce AI, we must ask what AI can do for the organization. And we must ensure we have the capabilities required to execute on AI projects. Our AI strategy identifies key AI initiatives that directly support our core business capabilities and align investments in AI technology and resources to deliver tangible value and drive business success.

Our AI strategy provides a holistic view of where our IT department will invest resources over the next year to leverage AI technologies that will support our business strategy. It demonstrates how we will align our resources, efforts, and budget to support ACME Corp's corporate direction and top six AI initiatives.

To achieve this strategy, our IT department must remain focused on the key AI initiatives outlined in this document. These initiatives are the tactics we will use to support our business stakeholders in achieving their goals.

This strategy was developed in cooperation with many business stakeholders. I am confident that together we can achieve our shared vision and demonstrate remarkable success. I look forward to working with all of you in helping ACME Corp achieve its corporate goals.

ACME Corp's AI Strategy Roadmap

1 AI Vision and Mission

AI Vision: We will use AI to vastly improve our client outreach as well as their experience with every engagement channel.

AI Mission: IT will harness the power of AI technologies to support and drive company innovation, efficiency, growth, and resilience. We are committed to strategically integrating AI into business operations through business-aligned initiatives while maintaining secure and high-quality data practices and following our foundational AI principles.

2 Our Strategic AI Guidelines

- Align With Business Initiatives
- Integrate With Existing Structures & Processes
- Buy Over Build
- Gen AI Will Not Replace Original Content

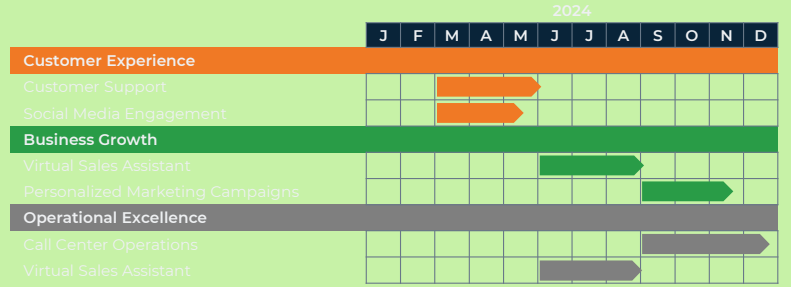

3 To support the business, AI will enable and transform the organization's top valued projects.

Organizational Strategy	Aligned Strategy	AI Strategy
Conveys the current state of the organization and the path it wants to take. Identifies future goals and organizational aspirations. Communicates the initiatives that are critical for getting the organization from its current state to the future state.	Establish a business-driven AI vision and mission statement and strategic AI principles to guide the organization's AI investments. AI goals and objectives optimization can be and should be linked, with metrics, to the corporate strategy and ultimate organizational objectives.	Establish foundational AI guiding principles to mitigate the risks of deploying AI-based solutions. Identify AI initiatives that will support the business and key AI objectives. Outline staffing and resourcing for AI initiatives. Communicate the organization's budget and spending on AI.

4 Our top initiatives collectively support our business goals and improve the delivery of products and services.

5 Our AI roadmap consolidates the value-driven business capabilities being augmented/automated with AI.

Introduction and Business Context

1. Our approach
2. Key stakeholders

How we defined our AI strategy

<ACME> leveraged our executive team and IT group to lead the development of this AI strategy. As part of the overall approach, various stakeholders from across the organization were engaged for interviews and a diagnostic assessment of our AI capabilities. Additionally, we engaged a third-party research firm to help facilitate a four-day workshop with the IT department leadership team. Our stakeholder process involved introducing debate, review, and recommendations throughout the entire planning cycle.

We leveraged our <ACME> mission and guiding principles and a strategic direction survey to help inform our AI strategy. We also leveraged the methodology prescribed to ensure a structured and disciplined approach to gather feedback and identify related challenges, risks, and opportunities.

Update this part with the organization's name and make edits where necessary.

AI Strategy Approach

1 **Establish an AI Vision and Align AI & Organizational Strategy**
Spend time up-front building a unified strategy by aligning organizational strategies with the AI strategies.

2 **Identify AI Use Cases**
Leverage the AI use case repository and identify AI use cases that resonate with your strategic business goals and capabilities.

3 **Assess Current AI Maturity**
Discuss with key stakeholders and SMEs and review documentation and current initiatives.

4 **Prioritize Initiatives**
Assess if the opportunities align with the business, foundational AI, and guiding principles. Are there sufficient resources to execute?

5 **Build an AI Roadmap**
The roadmap should provide a vision of how you will prioritize and simplify the actions required to deliver the identified AI applications.

Key Stakeholders

Engagement helps inform AI strategy

Executive Leaders

- Joel Adams – Chief Executive Officer
- John Doe – Chief Information Officer
- Dan Miller – Chief Financial Officer

Others

- Richard Wallace – VP Customer Experience
- Jasen Nurke – Director, IT Enterprise Architecture
- Jared Ambra – Director, Security and Operations
- Creighton Tenney – Director, PMO Technology Delivery
- Brett Decker – PM/Agile/Business Analyst

Workshop Outcomes

Scope of AI Strategy

1. AI vision statement
2. AI goals
3. Strategic guidelines for AI strategy

Sample ACME Corp Data

ACME Corp's AI vision

Our vision for the use of AI at ACME Corp is aligned with our overarching IT and corporate mission and vision statements, which inform our guiding principles for the use of AI.

Replace with your AI vision statement.

AI VISION

We will use artificial intelligence to vastly improve our client outreach as well as their experience with every engagement channel.

AI MISSION

To harness the power of AI technologies to support and drive company innovation, efficiency, growth, and resilience. We are committed to strategically integrating AI into business operations through business-aligned initiatives while maintaining secure and high-quality data practices and following our responsible AI principles.

(Optional) Include an AI mission statement if you developed one.

Sample ACME Corp Data

ACME Corp's Year 1 Goals

What we heard from our stakeholders

Replace the content on this slide with your own company business goals.

Customer Experience

Focus on differentiating or improving the client experience.

Market Growth

Focus on growth through expansion of product, services, or market.

Operational Excellence

Focus on improving efficiency, effectiveness, or cost optimization.

Innovation

Focus on improving product/service development or time to market.

Risk Mitigation

Focus on reducing risks with the development, deployment, and execution of AI applications.

Primary

Secondary

Include a notes section if there are any expected changes to primary and secondary goals in the future.

Notes:

- Client services will be primary but more tactical in the next 9-12 months (FY25).
- Growth will be primary and innovation secondary for our FY26-28 strategic plan.

Sample ACME Corp Data

Strategic principles for our AI strategy

The following guiding principles define the values that drive our AI strategy in Year 1 and provide the criteria for our 12-month planning horizon.

Replace the principles below with your AI strategy guiding principles.

01

Align With Business Initiatives

AI initiatives must deliver business value and align with the company's strategic objectives. We will prioritize AI use cases that enable or create business capabilities aligned with the organization's key initiatives.

02

Integrate With Existing Structures and Processes

AI use cases should not be viewed in isolation. AI initiatives and technology should be integrated into existing business processes and workflows to optimize and streamline them. AI governance should be incorporated into existing governance structures as well.

03

Buy Over Build

We will prioritize sourcing existing market solutions over building machine learning models in-house.

04

Gen AI Will Not Replace Original Content

Using generative AI for content production and output would compromise our research quality and integrity. Gen AI must not be used for any client-facing content production.

Workshop Outcomes

AI Maturity and AI Use Cases

1. High-value, high-priority AI use cases
2. Business goals and AI uses cases alignment
3. AI maturity dimensions
4. AI maturity assessment results

Sample ACME Corp Data

We identified our challenges and candidate AI use cases

Input possible challenges you may run into when implementing use cases.

	Customer Experience	Revenue/ Growth	Operational Excellence	Innovation	Risk Mitigati
Challenges	1. Data privacy and the use of client data 2. Client lack of tech savviness	1. Access plan digital strategy clarity	1. Data management and governance 2. Heterogenous technology stack 3. Limited AI skills deficiency	1. Limited R&D investment pool/funding 2. Cost containment	1. Data quality assurance 2. Distributed enterprise risk function
Opportunities	1. Develop an AI-driven recommendation system to analyze and provide insights from client requests and engagements for our products/services to improve sales. 2. Use chatbots to assist customer support with troubleshooting and technical support. 3. Augment and accelerate the creation of marketing content including ad copy, product descriptions, scripts for video ads, and product demos.	1. Personalize customer engagements with a virtual sales assistant to improve close rates for target offerings/ services. 2. Develop personalized marketing campaigns to improve or increase adoption for target offerings/services.	1. Use AI to analyze and automate calls to improve customer service. 2. Use code generators to improve productivity of programmers. 3. Improve chatbot accuracy and performance by accessing the company's data assets in a safe and secure manner. 4. Include technical virtual assistants/chatbots in call centers to provide easier access to technical support and troubleshooting documentation to improve customer support.	1. Perform sentiment analysis on social media data (social media posts, blog posts, emails) to improve market segmentation and marketing campaigns.	1. Use an AI assistant to analyze logs and reduce cybersecurity risk and increase data protection. 2. Performance analytics (adherence to policies).

Map use cases in opportunities row based on whichever business goal they are associated with.

Sample ACME Corp Data

We identified specific AI use cases that will enable ACME Corp's business initiatives

Customize this slide to reflect your business's goals, initiatives, and capabilities, and link them to your AI use cases.

We evaluated our ability to support AI projects in five key areas

AI GOVERNANCE

Our ability to govern AI-related risks and ensure expected value realization from AI.

DATA MANAGEMENT

Our ability to deliver accessible, high-quality data sets that drive business insights in line with our principles and best practices.

PEOPLE

The skills, experience, knowledge, and resources required to support governance, data, processes, and technology to support AI capabilities.

PROCESS

The processes and resources to design, develop, deliver, and support AI applications.

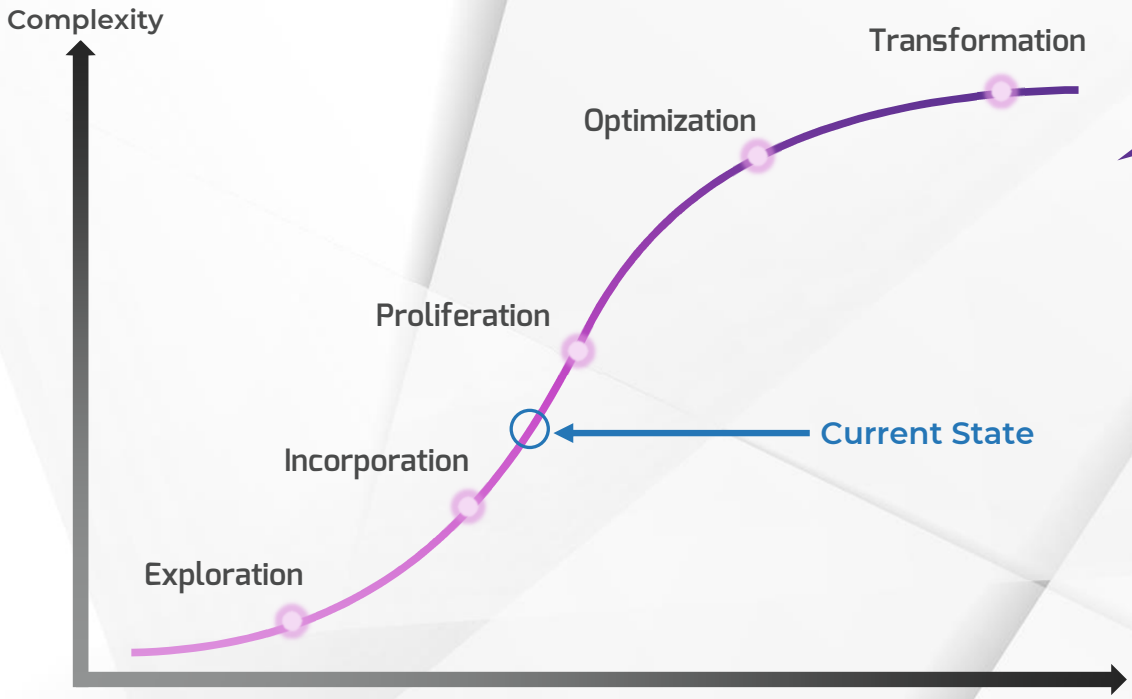

TECHNOLOGY

The technology infrastructure required to support AI applications.

This slide describes the five areas that were assessed in the maturity assessment and shouldn't require revision.

Sample ACME Corp Data

We evaluated our current AI capabilities using Info-Tech's AI Maturity Model

Update this chart with current and target maturity scores.

Each of the five key AI domains were assessed using this maturity scale.

Technology-Centric

Exploring and piloting AI technologies, starting by addressing the technical challenges of building a functional AI model.

Principles-Based

Principles are adopted to guide model development in a responsible manner to address consumer and government demands.

Workshop Outcomes

Prioritized AI Initiatives

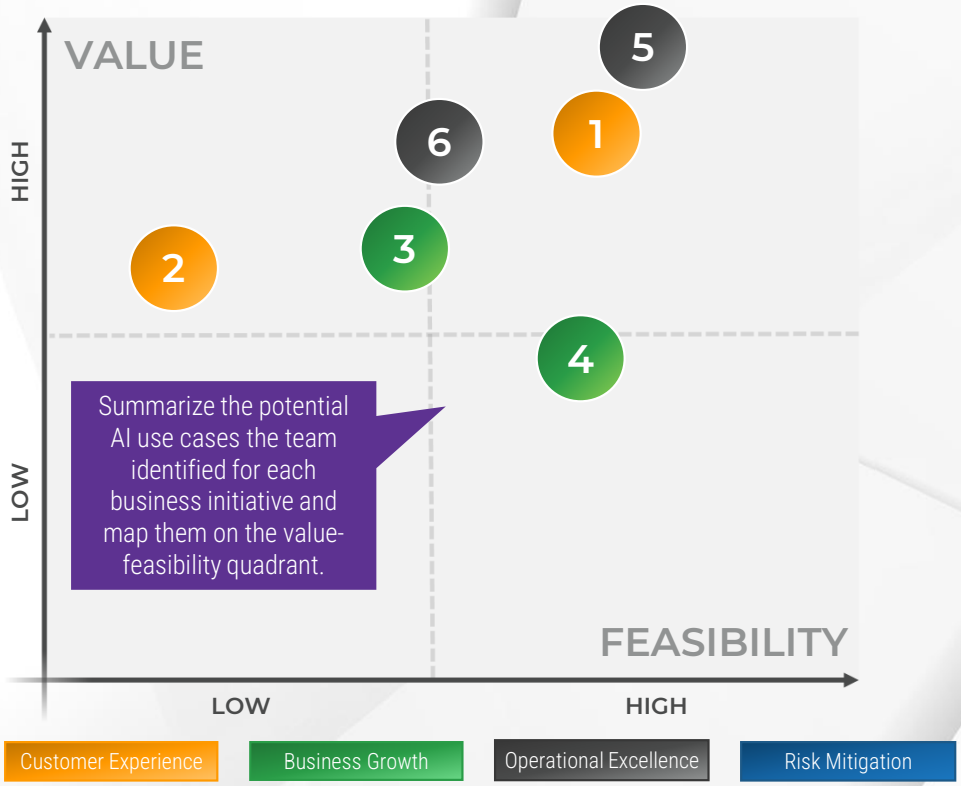

1. Prioritized list of AI initiatives
2. Initiative one-pagers for selected AI use cases

Sample ACME Corp Data

Prioritizing AI initiatives

Each AI use case was scored against the predefined value and feasibility criteria to prioritize the initiatives with the highest potential value and feasibility to execute.

	Initiative	Description
1	Customer Support	Use AI to leverage the company's existing knowledge base to ensure that support representatives can provide accurate and up-to-date information to the client.
2	Social Media Engagement	Use AI to perform sentiment analysis and proactively engage clients to address potential concerns.
3	Product/Service Recommendations	Use AI to analyze client calls and recommend the product/ service to best address their requirements.
4	Personalized Marketing Campaigns	Use AI to analyze customer data to personalize marketing collateral.
5	Call Center Operations	Use AI to train new employees to deliver improved service.
6	Virtual Sales Operations	Use chatbots to assist Sales with onboarding, product knowledge, and sales support.

Sample ACME Corp Data

1. Customer support

Use chatbots to assist customer support with troubleshooting and technical support.

AI GOAL CATEGORY

Customer Experience

INITIATIVE DESCRIPTION

- Implement technical virtual assistants or chatbots in call centers to provide easier access to technical support and troubleshooting documentation.
- Improve customer experience and customer satisfaction by enabling quick issue resolution.
- Ongoing resource support will be required to train and maintain chatbot.

PROJECT TIMELINE

QUANTIFIED VALUE

^ Est. 5% ROI, VP of Sales

BUSINESS VALUE — HIGH

Increase customer satisfaction and reduce training time for new customer support representatives.

OTHER EXPECTED BENEFITS

Chatbot can be leveraged for other use cases and departments if successful.

INCREMENTAL COST

Labor	$10,000
Systems	$60,000
Contract	$50,000
Total	$120,000

FEASIBILITY — HIGH

Target AI capabilities required to implement	**Low**
Risk	**Medium**
Stakeholder support	**High**

COMPLEXITY/DEPENDENCIES

- Data to inform chatbot must be thorough, cleansed, and up to date.

PROJECT TEAM

Business Sponsor: <Name>
IT Sponsor: <Name>
PM: <Name>

Sample ACME Corp Data

2. Social media engagement

Use sentiment analysis on social media posts to identify opportunities to improve prospecting calls and customer support.

AI GOAL CATEGORY

Customer Experience

QUANTIFIED VALUE

Est. 5% ROI, VP of Marketing

INCREMENTAL COST

Labor	$10,000
Systems	$60,000
Contract	$50,000
Total	$120,000

INITIATIVE DESCRIPTION

- Perform sentiment analysis on social media data (social media posts, blog posts, emails) to improve market segmentation and improve marketing campaigns.
- Define scoring criteria for leads and use AI predictive lead scoring tool to identify the highest quality leads in the pipeline by assessing lead data against criteria.

PROJECT TIMELINE

BUSINESS VALUE — MEDIUM+

Improve brand awareness and visibility and generate leads.

OTHER EXPECTED BENEFITS

Improve prospecting strategy based on insights and trends.

FEASIBILITY — LOW

Target AI capabilities required to implement	Low
Risk	Medium
Stakeholder support	Low

COMPLEXITY/DEPENDENCIES

- Approval of software selection and purchase.
- Integration to CRM and call analysis software.

PROJECT TEAM

Business Sponsor: <Name>
IT Sponsor: <Name>
PM: <Name>

Sample ACME Corp Data

3. Product/Service Recommendation

Use AI to analyze client requirements and recommend the best product or service offering.

AI GOAL CATEGORY

Business Growth

QUANTIFIED VALUE

Est. 10% ROI, VP Product Marketing

INCREMENTAL COST

Labor	$10,000
Systems	$0
Contract	$15,000
Total	$25,000

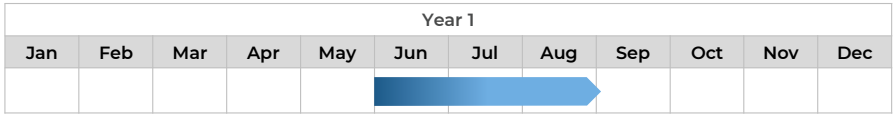

INITIATIVE DESCRIPTION

- Develop an AI-driven system to analyze and provide insights on client requests for our products/services.
- Build recommendation algorithms that suggest tailored resources based on the client's specific requirements.
- Ensure complex requests can still be routed to humans for handling or validation.

FEASIBILITY — MEDIUM

Target AI capabilities required to implement	**Medium**
Risk	**Medium**
Stakeholder support	**Medium**

PROJECT TIMELINE

BUSINESS VALUE — MEDIUM+

Improve customer experience through quick and accurate delivery of relevant information and assistance.

OTHER EXPECTED BENEFITS

Reduce employee effort and time spent manually sifting through requests and research to appropriately match them.

DEPENDENCIES

- Integration with CRM.
- Access to AI implementation expertise.
- Collaboration and model training by product SMEs.

PROJECT TEAM

Business Sponsor: <Name>
IT Sponsor: <Name>
PM: <Name>

Sample ACME Corp Data

4. Personalized marketing campaigns

Analyze past customer engagements to customize and personalize marketing engagements.

AI GOAL CATEGORY

Business Growth

QUANTIFIED VALUE

^ Increase webinar attendance by 8%, VP Product Marketing

INCREMENTAL COST

Labor	$50,000
Systems	$0
Contract	$20,000
Total	$70,000

INITIATIVE DESCRIPTION

- Leverage AI-powered call analysis software to analyze prospect calls.
- Software will transcribe and analyze prospect calls and provide actionable feedback and insights for sales reps.
- Dashboard will include visualizations of call performance metrics and trends.
- Individual coaching and training recommendations will result from the analysis.

FEASIBILITY — MEDIUM+

Target AI capabilities required to implement	Medium
Risk	Medium
Stakeholder support	High

PROJECT TIMELINE

BUSINESS VALUE — MEDIUM

AI-powered insights will enable sales reps to tailor their approach and strategy to clients to improve prospect engagement.

COMPLEXITY/DEPENDENCIES

- None.

OTHER EXPECTED BENEFITS

Improve skill sets of sales reps through tailored coaching and training.

PROJECT TEAM

Business Sponsor: <Name>
IT Sponsor: <Name>
PM: <Name>

Sample ACME Corp Data

5. Call center operations

Use AI to analyze and automate calls to improve customer service.

AI GOAL CATEGORY

Operational Excellence

QUANTIFIED VALUE

Est. 20% ROI, VP Customer Support

INCREMENTAL COST

Labor	$10,000
Systems	$60,000
Contract	$50,000
Total	$120,000

INITIATIVE DESCRIPTION

- Leverage AI-powered call analysis software to analyze calls.
- Software will transcribe and analyze calls and provide actionable feedback and insights for call center reps.
- Dashboard will include visualizations of call performance metrics and trends.
- Individual coaching and training recommendations will result from the analysis.

PROJECT TIMELINE

BUSINESS VALUE — HIGH

AI-powered insights will enable call center reps to tailor their approach and strategy to clients to improve prospect engagement.

OTHER EXPECTED BENEFITS

Improve skill sets of call center reps through tailored coaching and training.

FEASIBILITY — HIGH

Target AI capabilities required to implement	Low
Risk	Medium
Stakeholder support	High

COMPLEXITY/DEPENDENCIES

- None

PROJECT TEAM

Business Sponsor: <Name>
IT Sponsor: <Name>
PM: <Name>

Sample ACME Corp Data

6. Virtual sales assistant

Use chatbots to assist Sales with onboarding, product knowledge, and sales support.

AI GOAL CATEGORY

Operational Excellence

QUANTIFIED VALUE

Est. 12% ROI, VP Sales

INCREMENTAL COST

Labor	$10,000
Systems	$60,000
Contract	$50,000
Total	$120,000

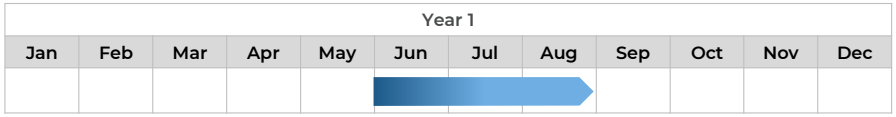

INITIATIVE DESCRIPTION

- Select and implement a chatbot tool to use as an internal sales assistant to provide instant responses to queries and offer suggestions based on existing sales training material and data.
- Existing vendor partners will be considered; specific tool will not be selected until next year when new solutions are announced.
- Implementation will be dependent on having a large library of up-to-date training content.
- Ongoing resource support will be required to train and maintain chatbot.

FEASIBILITY — MEDIUM

Target AI capabilities required to implement	Low
Risk	Medium
Stakeholder support	Medium

PROJECT TIMELINE

BUSINESS VALUE — MEDIUM+

Increase both prospect conversion rate and client engagement through improved sales knowledge and training.

OTHER EXPECTED BENEFITS

Chatbot can be leveraged for other use cases and departments if successful.

COMPLEXITY/DEPENDENCIES

- Data to inform chatbot must be thorough, cleansed, and up to date.

PROJECT TEAM

Business Sponsor: <Name>
IT Sponsor: <Name>
PM: <Name>

Workshop Outcomes

Roadmap & Next Steps

1. AI initiatives roadmap (Gantt chart format)
2. AI strategy communication plan
3. Next steps
4. Info-Tech related research

AI initiatives roadmap (Gantt chart format)

Year 1

		Owner	Jan	Feb	Mar	Apr	May	Jun	July	Aug	Sep	Oct	Nov	Dec
1	Customer Support	Dana Cho												
2	Social Media Engagement	Austin Wong												
3	Product/Service Recommendation	Nichelle Nicols												
4	Personalized Marketing Campaigns	Avery Brooks												
5	Call Center Operations	Gates McFadden												
6	Virtual Sales Assistant	Andrew Robinson												

AI strategy communication plan

Well-planned communications are essential to the success and adoption of our AI initiatives

To ensure the organization's roadmap is clearly communicated across the AI, data, technology, and business groups, develop a rollout strategy like this example.

Example

Audience	Channel	Level of Detail	Description	Timing
AI team	Email, meetings	All	• Distribute plan; solicit feedback. • Address manager questions to equip them to answer employee questions.	Year 1, Q3, (September, before entire data team)
Data management team	Email, Q&A sessions	Data management summary deck	• Roll out after corporate strategy, in same form of communication. • Solicit feedback, address questions.	Year 1, Q4 (late November)
Select business stakeholders	Presentations	Executive deck	• Pilot test for feedback prior to executive engagement.	Year 1, Q4 (early December)
Executive team	Email, briefing	Executive deck	• Distribute plan.	Year 2, Q1

AI-related Info-Tech research

Build a Robust and Comprehensive Data Strategy

Key to building and fostering a data-driven culture.

Govern the Use of AI Responsibly With a Fit-for-Purpose Structure

Enable your organization to transparently deliver effective and human-centric AI.

Address Security and Privacy Risks for Generative AI

AI risk mitigation starts with an acceptable use policy.

Drive Business Value With Off-the-Shelf AI

A practical guide to ensure return on your off-the-shelf AI investment.

Artificial Intelligence Research Center

Augment the power of your organizational DNA through machine learning and artificial intelligence.

→ Artificial Intelligence Research Center

Appendix

- AI goals and objectives
- Alternative roadmap examples
- Strategic journey table
- AI execution initiatives heatmap
- Example risk mitigation initiatives
- Example operational excellence initiatives
- Strategic vendors and partnerships
- Gap analysis: AI governance, infrastructure, and skills
- Foundational AI principles
- Executive committee structure
- Alternative strategy one-pager with foundational AI principles

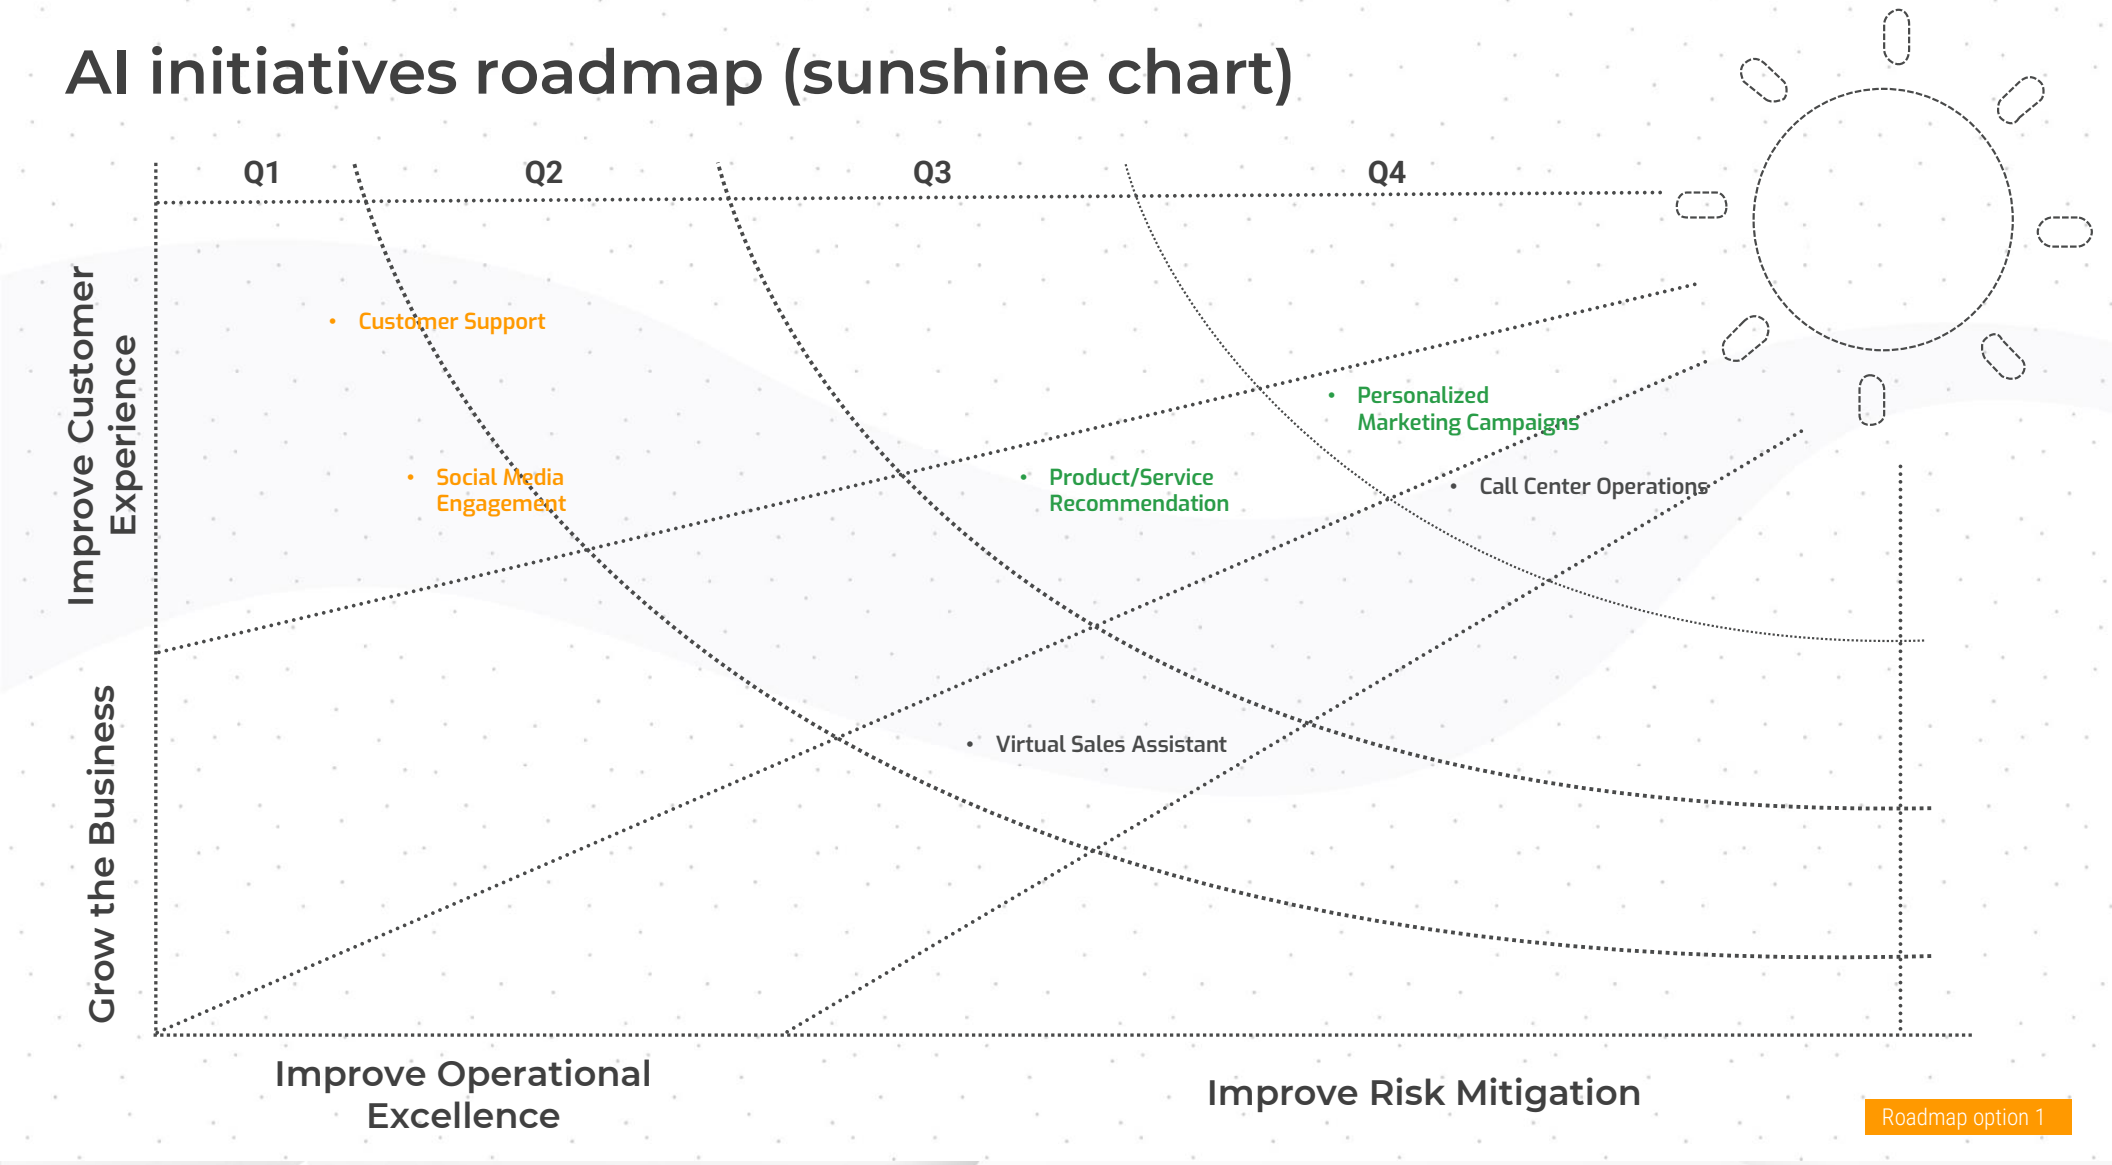

Our AI goals and objectives

Customize this slide to include your own objectives, metrics, and targets in each domain.

Progress toward AI goals will be measured against projected targets for the following key categories.

GOAL	OBJECTIVE	METRICS	TARGET
Improve Customer Experience	Improve the customer experience by customizing customer engagements and enhancing overall satisfaction.	• Sales, CSAT, duration of customer engagement	• Increase sales by 3% • Improve CSAT scores by 5%
Grow the Business	Improve sales adoption through targeted marketing campaigns and customized engagements and offerings.	• Sales, number of attendees to marketing events • Improve conversion rate	• Increase conversion of site visitors to FABs by 10% • Impact on CR for new prospects is 20%
Improve Operational Excellence	Reduce costs associated with target business capabilities.	• People, process, and technology costs	• Decrease cost infrastructure by 5%
Improve Risk Mitigation	Implement a comprehensive AI governance model to ensure responsible use of AI across the organization.	• Enhance client risk mitigation	• Keep reported client incidents at 0%

AI initiatives roadmap (sunshine chart)

Roadmap option 1

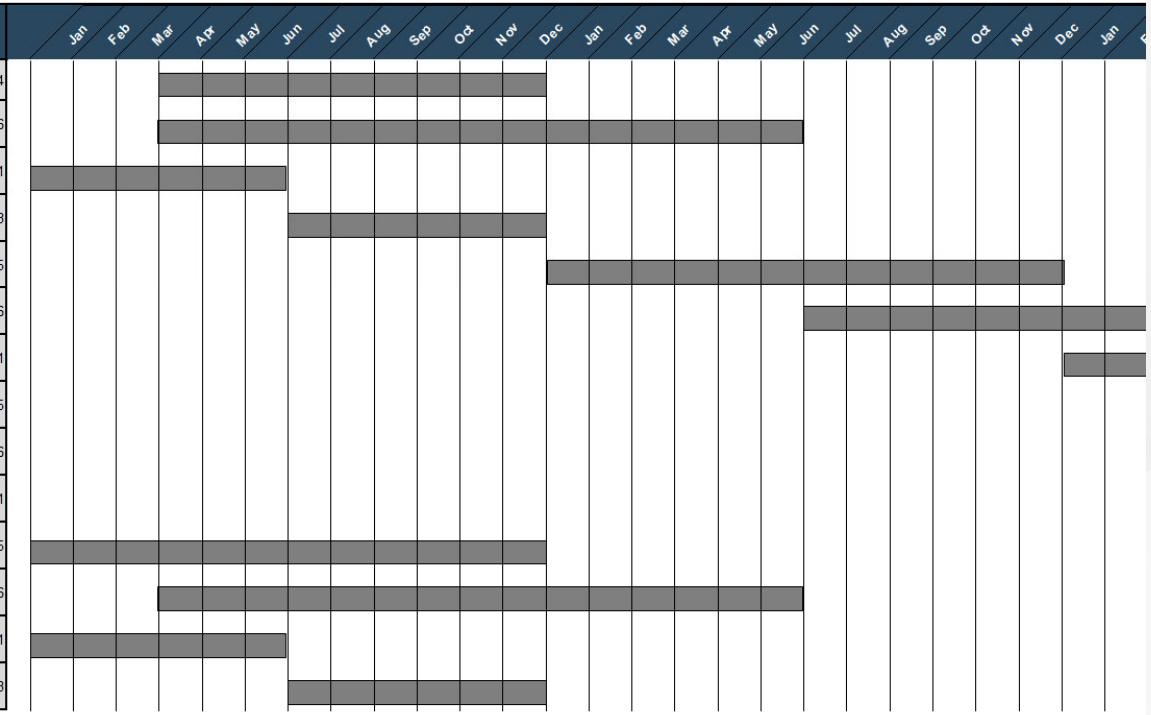

AI roadmap (Excel tool screenshot)

Roadmap option 2

Artificial Intelligence Roadmap (Gantt Chart Format)

Steps:
1. Review the Gantt chart below, based on the start/end dates in tab 4.
2. Ensure that this chart is realistic to your own organization. If there are any dates that need to be adjusted, adjust them accordingly in tab 4 to ensure consistency in this tool.

Value Driver	Project Name	Starts	Ends	Duration (Days)
Increase Revenue	Initiative 1: Create sales proposals	1-Apr-24	31-Dec-24	274
	Initiative 2	31-Mar-24	30-Jun-25	456
	Initiative 3	1-Jan-24	30-Jun-24	181
	Test 4	1-Jul-24	31-Dec-24	183
Improve Operational Efficiency	Test 1	1-Jan-24	31-Dec-24	365

$170,000
TOTAL

INITIATIVE DESCRIPTION

- Move two FTEs from the development team to a new ML Ops team.
- Hire one FTE to lead the team.
- Internal and external training for this team to support the following activities:
  - Vendor and model selection.
  - Model training and fine-tuning.
  - Prompt engineering.
  - Selecting a best-in-class LLM instance to train on chosen use cases.

PROJECT TIMELINE

BUSINESS VALUE

HIGH

Deliver business-enabling AI projects in line with good practices.

OTHER EXPECTED BENEFITS

Develop an internal ML engineering capability that can be reapplied to other projects in the future.

FEASIBILITY

Target AI capabilities required to implement	
Risk	**Medium**
Stakeholder support	**High**

COMPLEXITY/DEPENDENCIES

- Strategy and budget approval

PROJECT TEAM

IT Sponsor: <Name>
PM: <Name>

Strategic vendors and partnerships

We will leverage existing vendor relationships wherever possible to support our AI strategy.

In keeping with our guiding principles, we will focus on using off-the-shelf AI models and solutions rather than building our own. This approach will lower costs, decrease time to delivery, and reduce investment risks. We will also rely on our current vendor relationships to support our AI initiatives to the extent that they have the necessary capabilities to do so.

The core vendors and use cases we will leverage to support our AI strategy initiatives are highlighted on the right.

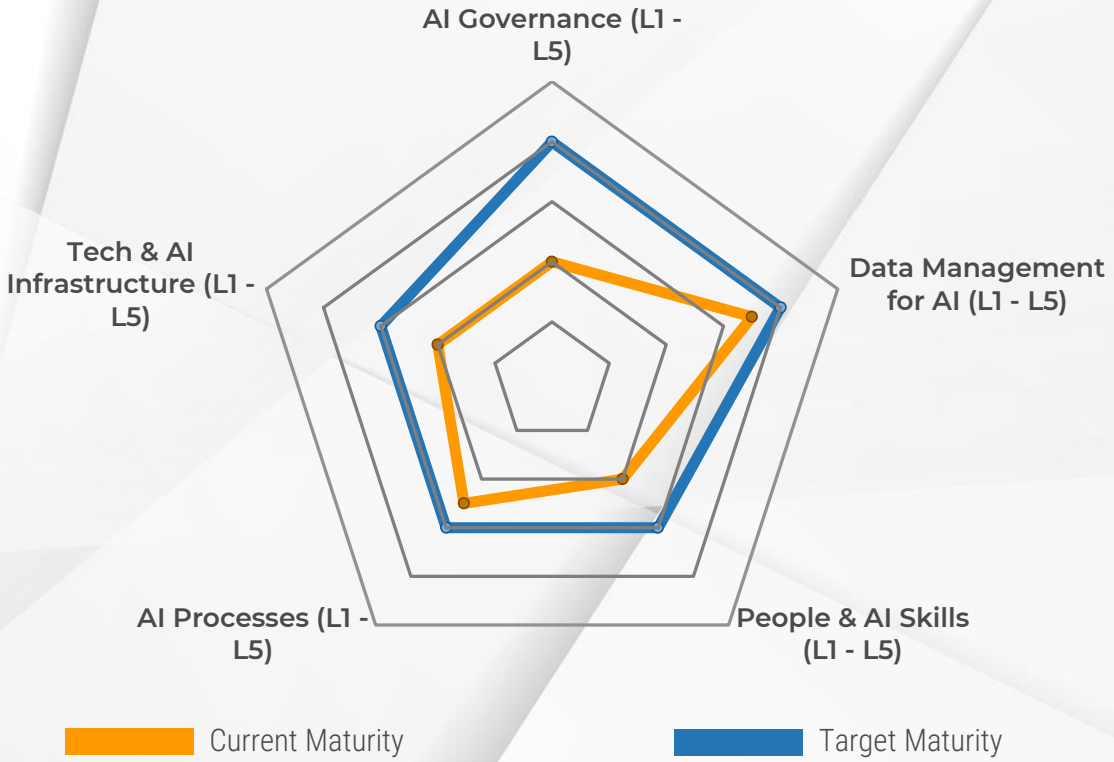

Customize this slide to describe your high-level approach to the vendors and partners you will leverage to implement your strategy.

Vendor	Primary Uses
Microsoft	Office productivity
aws	Web and content management
salesforce	Billing and CRM
CHORUS	Call recordings and analysis

Sample ACME Corp Data

Our most significant gaps are in AI governance, AI infrastructure, and skills

Our current state was identified through discussions with key stakeholders and SMEs and reviews of documentation and current initiatives. Our target state was determined based on our assessed need in each area to support business goals.

Present the results of the AI Maturity Assessment.

Sample ACME Corp Data

We identified gaps in foundational AI capabilities to support our strategic initiatives

Current State (Year 0)

Level 2: Incorporation

- We have defined the role and scope for AI governance.
- We have initiated pilot projects to gain practical experience and insights into AI applications.
- We have not deployed any AI applications at scale.
- We're focused on learning from the outcomes of pilot projects.

GAP ANALYSIS

AI Governance
We need to implement formal AI governance bodies, charters, memberships, decision authorities, and relationship with other governing bodies.

Data Management Operations
We need to strengthen existing capabilities around data integration, management, cleansing, and preparation for analysis.

Machine Learning Engineering & Operations
We need to build capabilities to select vendors and foundational models, train and fine-tune models, engineer prompts, and manage deployed models.

People & Skills
We need to augment our AI skills by either training our staff or acquiring the skills necessary for successful implementations.

Technology Infrastructure
We need to provide a platform to support and optimize performance for the AI application.

Target State (Year 1)

Level 3: Proliferation

- We will use tools to automate and validate compliance with policies, principles, and standards.
- We will support implementation of AI applications at scale.
- We will move beyond the experimental stage and operationalize AI systems in specific business functions.
- AI systems will be integrated with business processes and workflows.

Sample ACME Corp Data

Our foundational AI principles

The use of AI within the organization will follow these foundational AI principles.

Use these foundational AI principles or replace with your own.

Validity & Reliability

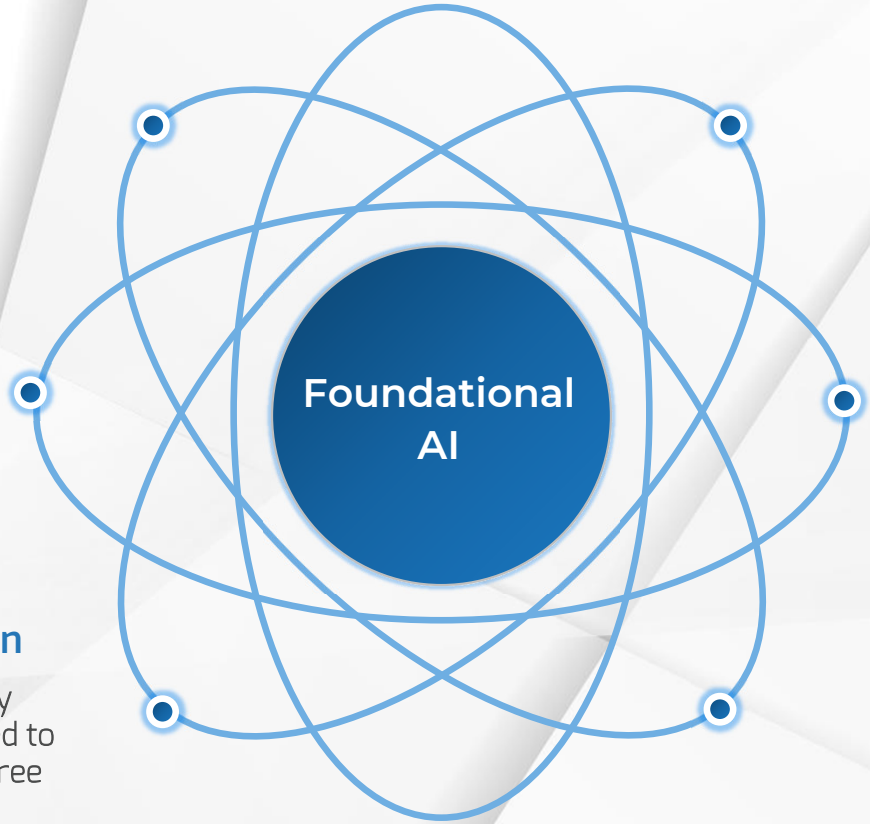

AI systems should perform reliably and as expected.

Accountability

We will identify accountability for the outcomes of AI systems and decisions that are made as a result of the model.

Fairness & Bias Detection

We will endeavor to ensure any models, systems, and data used to make predictions are fair and free from bias.

Safety & Security

AI models and systems should be resilient, secure, and safe throughout their entire lifecycle.

Data Privacy

Privacy values such as anonymity, confidentiality, and control will guide our choices for AI model/system design.

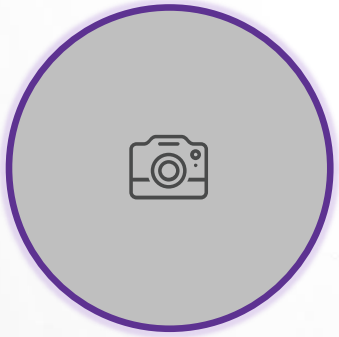

Explainability & Transparency

AI models/systems should provide meaningful information and be transparent and explainable to end users.

Executive committee structure

Describe each selected member of the Executive AI Subcommittee and why they were selected. If you will also have a board-level committee, add an additional slide similar to this to describe its members.

Sophie Martin

CHAIRPERSON

Sophie's extensive AI industry knowledge, strong leadership skills, and track record in strategic planning with the organization made her the ideal choice to chair the committee.

Jack Wilson

VICE CHAIRPERSON

Jack's track record of successfully overseeing AI initiatives to date make him a valuable contribution to the subcommittee's strategic direction.

Alex Ramirez

ADVISOR

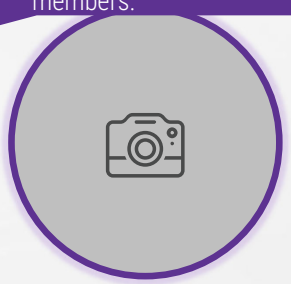

With his extensive experience in data privacy and ethics, Alex will set the AI strategy and ensure it follows foundational AI principles.

Emily Chen

SPECIALIST

Emily has extensive experience with cybersecurity and risk management and will ensure the AI strategy and initiatives follow risk governance principles.

David Lee

SME

David has expertise in AI model training and deployment along with AI ethics and data privacy regulations.

ACME Corp's AI Strategy Roadmap

1 AI Vision and Mission

AI Vision: We will use artificial intelligence to vastly improve our client outreach as well as their experience with every engagement channel.

AI Mission: IT will harness the power of AI technologies to support and drive company innovation, efficiency, growth, and resilience. We are committed to strategically integrating AI into business operations through business-aligned initiatives while maintaining secure and high-quality data practices and following our foundational AI principles.

2 Our Strategic AI Guidelines

- Align With Business Initiatives
- Integrate With Existing Structures & Processes
- Buy Over Build
- Gen AI Will Not Replace Original Content

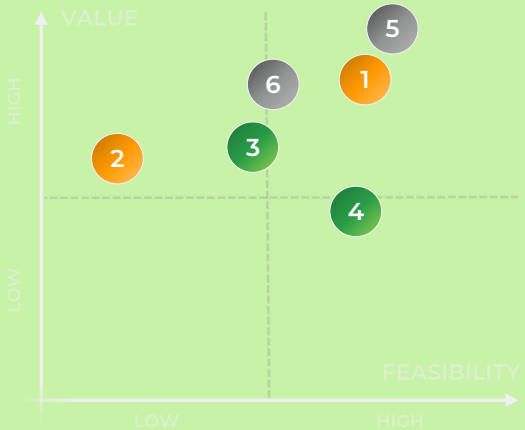

3 To support the business, AI will enable and transform the organization's top valued projects.

Organizational Strategy	Aligned Strategy	AI Strategy
Conveys the current state of the organization and the path it wants to take.	Establish a business-driven AI vision and mission statement and strategic AI principles to guide the organization's AI investments.	Establish foundational AI guiding principles to mitigate the risks of deploying AI-based solutions.
Identifies future goals and organizational aspirations.	AI goals and objectives optimization can be and should be linked, with metrics, to the corporate strategy and ultimate organizational objectives.	Identify AI initiatives that will support the business and key AI objectives.
Communicates the initiatives that are critical for getting the organization from its current state to the future state.		Outline staffing and resourcing for AI initiatives.
		Communicate the organization's budget and spending on AI.

4 To provide safeguards and to prevent unintended consequences, we have established a set of Foundational AI Guiding Principles

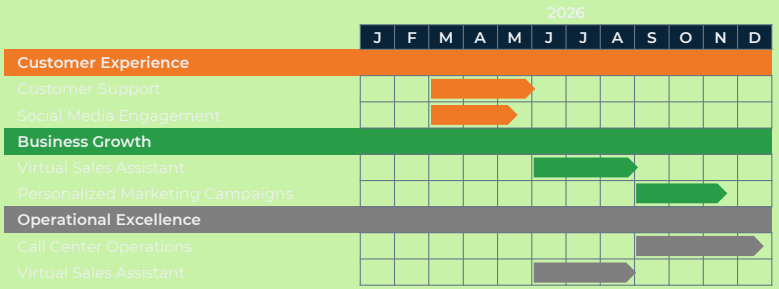

5 Our top initiatives collectively support our business goals and improve the delivery of products and services.

1. Customer Support
2. Social Media Engagement
3. Product/Service Recommendations
4. Personalized Marketing Campaigns
5. Call Center Operations
6. Virtual Sales Operations

6 Our AI roadmap consolidates the value-driven business capabilities being augmented/automated with AI.
